Abstract not available for AU 2003238973 (A1)

Abstract of corresponding document: WO 2004001488 (A1)

A multi-layer display system (1) consists of at least two display layers: a front display layer (2) and a rear display layer (3). At least one display layer displays real time information from sources within the light of sight of the display system (i.e. from sources located behind the display system).
